61st Wyoming Legislature ★ 2011 General Session

HB0022, Phased in fuel tax increase.

Sponsors: Joint Transportation, Highways and Military Affairs Interim Committee

Comments

A phased in tax gasoline increase. The legislature should consider other ways of raising funds, e.g. privatization. If Communist China can have privately run highways, why can't we?

The redirection of tax funds into areas where the vehicles are used is positive. An increase in fuel tax of \$.10 per gallon in 3 years in increasing the size of government and excessive. Find ways to cut back not expand. Fuel taxes are one example of a good tax. It is generally used for what is taxed.
