61st Wyoming Legislature ★ 2011 General Session

HB0165, Insurance-coverage of inherited disorders.

Sponsors: Representative(s) Zwonitzer, Dn., Craft, Krone and Teeters

Comments

Requires inherited enzymatic disorder coverage in health insurance plans. More legislative micromanagement, violation of the right to contract -- what if you don't want this coverage? This raises (however minutely) the cost of coverage for everyone. What in principle is the difference between this and the mandatory insurance requirement of Obamacare?

Pres. Grover Cleveland said, "While the people should take care of the government, the government should not take care of the people." This is what is called "specific welfare." Government's role is not to care for the people, that is the role of charity.
