Comments

Industrial policy on the sly. An appropriation of \$50,000.00. Governments should not be encouraging (or discouraging) private enterprise. While pointing out federal regulatory follies is a worthwhile goal, that should be left to private enterprise.

The intent of this bill is what state governments should be doing, upholding and defending (putting the run away national government in its place) our state's legitimate functions in our federal (shared state and national) government.
