61st Wyoming Legislature ★ 2011 General Session

SF0064, Wyoming livestock identification and traceability program.

Sponsors: Joint Agriculture, State and Public Lands and Water Resources Interim Committee

Comments

While we like the idea of getting out of the national livestock tracking system, we are not sure that having the government run a statewide one is any great improvement. The bill appropriates \$315,000 for corporate welfare. If the stock growers want a statewide livestock tracking system, let them establish a completely voluntary one.

Weighted Rating: -1.00. Unweighted Rating: -1.00.
