62nd Wyoming Legislature ★ 2014 Budget Session

HB0081, Education-early childhood programs-2.

Sponsors: Joint Education Interim Committee

Comments

Yet another expansion of the fatally flawed government school system. This bill lets the state get its claws on even younger children.

Withdrawn by Sponsor. No vote recorded. However, that said, this is a lousy bill! Ah, yes, a grant program that sounds like it was written by a grantsman in the Department of Education (DOE) and not by a legislator. The central purpose of improving early childhood education is quite commendable but quickly goes downhill as it becomes clear that it is simply a bureaucratic boondoggle designed to fatten bureaucrats in the DOE while enabling the State of Wyoming to usurp more local powers from school boards and parents using money as the lubricant for extending the tentacles of the state deeper into the lives of the People. If the authors of this bureaucratic wet dream were serious about the purported objective they would have created something more empowering for school boards and parents such as a voucher system!

Weighted Rating: -2.50. Unweighted Rating: 1.00.
